## Updating Proxima server with a PXU file

Version: 1.1 Date: 12/06/2024

Before you begin, check that you have: the Proxima server, an HDMI screen, a computer connected to the Internet and networked to the Proxima server.

## 1. Preparing to install PXU firmware

- Download the PXU firmware file from the Waves System website.
- Connect to the Proxima server from a web browser.
- In the **My file** menu, at the root, add a folder named **UPDATE** (in uppercase) using the **New folder** function.
- Copy the **.pxu** file into the **UPDATE** folder.

Sottingo	Reboot Reboot the server					REBOOT	
Settings	Shutdown						
? Help	Do complete server	r shutdown				SHUTDOWN	
된 Logout	System update Update firmware of	the server				UPDATE	

- Attendez quelques secondes avant que la fenêtre de progression de la mise à jour **Proxima server is updating** apparaisse :
- Wait a few seconds before the **Proxima server is updating** window appears:

🗘 Proxima	
	Profile Settings Display Settings Volume Settings Network Date and Time System About
<ul> <li>Proxima Composer</li> <li>My files</li> </ul>	System Reboot Reboot Reboot Reboot
<ul><li>3 Settings</li><li>7 Help</li></ul>	Shutdown Do complete server shutdown SHUTDOWN
Đ Logout	System update Proxima server is updating Update firmware of the server
	Please wait
	REFRESH

The server will update the firmware, then completely reboot the system. Wait until the **Proxima server is updating** window is completely gone.

Warning! Do not turn off the server during the server update operation.
