

WEB REMOTE CONTROL

VP320/VP330/EVP380

Installation

Drag your media files in the corresponding folders 001 to 006.

Copy the whole content on a USB stick, a µSD or in the internal memory

Use

Retrieve the IP address of the player using the « i » touch of the infrared remote control

You should make sure that the IP address will not change with time: you can fix it using a static address or binding a static IP address.

Once you have the IP address, you can display the web remote control from any web browser with the following address:

```
http://<ip address >/www/index.html
```

Authentication

This webapp use the login « user » with password « password ».
